### **DayClips Implementing Advanced Propriety Features for Enhancing Online Appointment Scheduling**

*DayClips, the leading company for online appointment scheduling advances capabilities for patients and healthcare professionals.*

Belmont, California – June 2010 – DayClips announced development of proprietary features that enhance online appointment scheduling for patients and their healthcare professionals. The company has experienced record growth over the past twelve months among primary care and specialists from various medical disciplines.

DayClips enables patients and clients of healthcare professionals to schedule online appointments anytime day or night. Professionals are able to integrate online appointments with those made in-office and by telephone into a master calendar for in-office use. Patients receive email appointment confirmations and email appointment confirmations. The comprehensive and free-to-use DayClips appointment scheduling system is noted for its intuitive simplicity.

Some of the exciting technologies that will soon be available for DayClips users include:

- ❑ Communication options that include automated telephone messaging, text messaging, and FAX delivery.
- ❑ Appointment calendar viewing on cellphones.
- ❑ GPS guidance for travel to and from appointments.
- ❑ Brilliant new versions of DayClips in Spanish, Japanese, Chinese, and French.

An exciting new feature recently implemented by DayClips allows healthcare professionals with their own websites a link to their own page on DayClips. This link allows visitors to their website an opportunity to schedule appointments directly on the healthcare professional's page on DayClips.

In addition, DayClips offers unique website development solutions that allow practices of any size or specialty to easily create their own personalized website. DayClips offers generic websites that are easily customizable. Healthcare professionals using the DayClips generic websites do not need to rely on costly and time-consuming programming to build, modify, or change their website. The DayClips generic websites rivals in features and sophistication customized websites that cost thousand of dollars more. Radiologist Daniel Powers, M.D. said, "The generic websites offered by DayClips provide a level of security and sophistication at an unbeatable cost. It is one of the best values on the internet."
